Laterals

V-TRAK

Cane mounted, Multi-Axis Thoracic Support

A development of the original V-Trak Lateral hardware, this new lateral is an addition to the range. This cane mounted lateral is a cost effective solution designed for the user, engineer and therapist. It provides fully adjustable lateral support with a wide range of formable pads that can be adjusted and rotated. This system helps reduce point pressure and delivers optimum contact comfort, function and clinical outcomes.

MOVEMENT –The cane mounted lateral allows for fully lockable adjustment and movement. Offset and Rotation - using a precision 5/8th" ball joint at the pad for positioning and contact. This means lateral positioning isn't limited by the backrest and/or cane position and provides a wide range of movement for convenient and precise positioning.

QUICK RELEASE / SWING AWAY – Making use of the release button the hardware is retained on the mounting block and can simply swing away for easy transfer of the user. The location holes allow for simple return and do not reset the optimum position prescribed initially.

CANE MOUNTED – ADAPTABILITY- Mounting the Lateral is easy and uses the V-Trak mounting block that has been used by rehabilitation engineers in the field for 10 years. The mounts as standard is compatible with cane sizes - 1" - 7/8" - 3/4" inches (19/22/25 mm) and other mounting options are available for awkward cane profiles and sizes.

PADS – These are formable laser cut pads. The pads can be simply formed to the users shape and are available in different materials so you can provide the best contact surface for your client. This reduces pressure, temperature while increasing comfort.

MULTI AXIS BALL JOINT - The pad as standard allows for full rotation and adjustment at point of contact, much like how your hands would support laterally. This provides full optimum contact comfort, forming and adjusting to the users' body.

Cane mounted laterals

Simple Quick release

Controlled Swing away

Multi axis ball joint with 360 ° rotation for optimum surface contact

Lateral Pads & Dimensions

Formable pads

Simple adjustment

Hardware Dimensions

A. 65m
B. 180mm
C. 85mm

CANE MOUNTED LATERAL SUPPORTS (HARDWARE) - Multi adjustable ball head pad and quick release / swing away as standard - 19mm-25mm

PRODUCT CODE	DESCRIPTION
TSCM LH	Cane mounted Lateral Thoracic Support - Quick release and swing away hardware - Left hand
TSCM RH	Cane mounted Lateral Thoracic Support - Quick release and swing away hardware- Right hand
TSACM U	Cane mounted Single Anterior Thoracic Support - can be used on left or right side

Lateral Features

Mult-axis

Stepless Adjustment

Rotational adjustment

Mult-axis

Scoliosis

Adjustment For Growth

All Types of Wheelchair

One tool to install & adjust
